
VYRON AI // SYSTEM BLUEPRINT

OFFICIAL FEATURES & SYSTEM CAPABILITIES MANUAL

smartkhushal2007@gmail.com

01. Voice-Native Acoustic Core

Bidirectional real-time voice communications streamed via high-speed WebSockets. Routes queries between Groq (sub-1.5s latency responses) and Gemini (vision operations).

02. Creative Suite Automation Mode

Direct keyboard macro injections for Premiere Pro (timeline trimming & cuts), Photoshop (brush, lasso, selection tool changes), and After Effects (P/S/O/R properties).

03. Office & Analytics Expert

Natively generates presentation slide decks (.pptx) with animations/images, bulk writes Excel ranges (fills serial indices like 1-10), and automates voucher entries in Tally Prime.

04. Live PDF Visual Viewer & Editor

Opens local document PDF files in a scrollable visual CTKToplevel reader showing match highlighting, and supports visual find-and-replace text edits on stream.

05. Biometric Face Validation (BossCam)

Integrates a local computer camera verification loop, cross-referencing face prints before executing critical terminal prompts or PowerShell cleaning scripts.

VYRON SYSTEM SECURITY & UTILITIES

06. One-Time Activation License Lock

Locks access to the desktop GUI until a valid key (VYRON-XXXXX) is verified online. Keys are checked against a Next.js serverless API route and saved locally in license.json.

07. Secure 4-Digit PIN Vault

Provides an encrypted on-device credentials vault that prompts users for a secure 4-digit PIN during initialization and login sequences.

08. Mobile ADB Gestures & Linkage

Control phone notifications and gestures directly from the desktop shell. Sends notification alerts and coordinates gestures to active Android emulator ports.

09. Custom Tech JARVIS UI

High-tech responsive GUI dashboard built on CustomTkinter with glowing particles, diagnostic tickers, system metrics monitors, and live speed tests.

10. Kernel Utilities & PowerShell Cleaners

Automates system cleanup scripts (Recycle Bin wipes, temporary directory garbage removals) and manages system parameters (volume settings, mute, task monitoring).
